Winners of the Queen's Award for Enterprise 2001

FARMER'S NETFOL

Farmer's Netfol has been specially developed in Europe to work in the New Holland range of balers to preserve straw.

Trials throughout Europe and in the United States using New Holland fixed and variable chamber balers proved, that Netfol with its unique adhesive system, and prestretching of the film in production provides the perfect bale time after time.

Straw is increasingly becoming a valuable commodity for winter feed and bedding. It is essential to maximise the nutritional value and eliminate harmful moulds and spoilage. Research suggest that Netfol is the only film that gives protection throughout the winter months and preserves the straw in tight compact bales.

Features and Benefits

25micron Thickness
123cm Width
1000m Length

- Prestretched to provide the perfect, well formed bale
- Unique Adhesive System - ensures that the cut end of the film adheres to the bale and does not tail or blow in the wind.
- Less Wraps Required; 2.5-3.0 as opposed to 4.5-5.0 required from others.
- Distinctive Mint Green Colour - environmentally friendly
- Spreads consistently across the bale.
- Specially designed for use in New Holland balers.

**To ensure a tight bale,
always use NETFOL**
